# **EE-SX1320**

# Ultra-Compact Slot / SMD Type (Slot width: 2 mm)

- PCB surface mounting type.
- High resolution with a 0.3-mm-wide aperture.

Be sure to read Safety Precautions on page 3.

## **Ordering Information**

#### **Photomicrosensor**

| Appearance | Sensing method           | Connecting method | Sensing distance  | Aperture size (H × W) (mm)          | Output type     | Model     |
|------------|--------------------------|-------------------|-------------------|-------------------------------------|-----------------|-----------|
| 5.1        | Transmissive (slot type) | SMT               | 2 mm (slot width) | Emitter 1.4 × 1.4  Detector 1 × 0.3 | Phototransistor | EE-SX1320 |

## **Ratings, Characteristics and Exterior Specifications**

### Absolute Maximum Ratings (Ta = 25°C)

|                              | Item                      | Symbol           | Rated value          | Unit |
|------------------------------|---------------------------|------------------|----------------------|------|
| Emitter                      |                           |                  |                      |      |
|                              | Forward current           | lF               | 25 <b>*1</b>         | mA   |
|                              | Pulse forward current     | IFP              | 100 <b>*2</b>        | mA   |
|                              | Reverse voltage           | VR               | 5                    | V    |
| Detector                     |                           |                  |                      |      |
|                              | Collector-Emitter voltage | VCEO             | 12                   | V    |
|                              | Emitter-Collector voltage | VECO             | 5                    | V    |
|                              | Collector current         | lc               | 20                   | mA   |
|                              | Collector dissipation     | Pc               | 75 <b>*1</b>         | mW   |
| Operating temperature        |                           | Topr             | -30 to +85 <b>*1</b> | °C   |
| Storage temperature          |                           | T <sub>stg</sub> | -40 to +90 <b>*1</b> | °C   |
| Reflow soldering temperature |                           | Tsol             | 255 <b>*3</b>        | °C   |

- \*1. Refer to the temperature rating chart if the ambient temperature exceeds 25°C.
- **\*2.** Duty ratio: 1%, Pulse width: 0.1 ms
- **\*3.** Complete soldering within 10 seconds for reflow soldering.

## **Exterior Specifications**

| Connecting method | Weight (g) | Material |  |  |
|-------------------|------------|----------|--|--|
| Connecting method | Weight (g) | Case     |  |  |
| SMT               | 0.1        | PPS      |  |  |

### Electrical and Optical Characteristics (Ta = 25°C)

| Item         |                                      | Symbol                   | Value |      |      | Unit | Condition  |
|--------------|--------------------------------------|--------------------------|-------|------|------|------|--|
|              |                                      |                          | MIN.  | TYP. | MAX. | Unit | Condition  |

## **Safety Precautions**

To ensure safe operation, be sure to read and follow the Instruction Manual provided with the Sensor.

#### **CAUTION**

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

#### **Precautions for Safe Use**

Do not use the product with a voltage or current that exceeds the rated range.

Applying a voltage or current that is higher than the rated range may result in explosion or fire.

Do not miswire such as the polarity of the power supply voltage.

Otherwise the product may be damaged or it may burn.

This product does not resist water. Do not use the product in places where water or oil may be sprayed onto the product.

#### **Precautions for Correct Use**

Do not use the product in atmospheres or environments that exceed product ratings. This product is for surface mounting. Refer to Soldering Information, Storage and Baking for details.

Dispose of this product as industrial waste.

#### **Dimensions and Internal Circuit**

(Unit: mm)

#### **Photomicrosensor**

#### EE-SX1320

Aperture size (H x W)

| Terminal No. | Name      |  |  |
|--------------|-----------|--|--|
| (1)          | Anode     |  |  |
| (2)          | Cathode   |  |  |
| (3)          | Emitter   |  |  |
| (4)          | Collector |  |  |

Unless otherwise specified, the tolerances are  $\pm 0.2$  mm.

# **Tape and Reel**

## Reel (Unit: mm)

## Tape (Unit: mm)

## **Soldering Information**

#### **Reflow soldering: Temperature profile**

The reflow soldering can be implemented in two times complying with the following diagram.

All the temperatures in the product must be within the diagram.

#### Manual soldering

The manual soldering should not be applied to the products, otherwise the housing may be deformed and/or the Au plating may be peeled off by heat.

#### Other notes

The use of infrared lamp causes the temperature at the resin to rise particularly too high.

All the temperatures in the product must be within the above diagram. Do not immerse the resin part into the solder. Even if within the above temperature diagram, there is a possibility that the gold wire in the products is broken in case that the deformation of PC board gives stress to the products.

Please confirm the conditions (including material and method of flux and cleaning) of the reflow soldering fully by actual solder reflow machine prior to the mass production use.

## **Storage**

#### Storage conditions

To protect the product from the effects of humidity until the package is opened, dry-box storage is recommended. If this is not possible, store the product under the following conditions:

Temperature: 10 to 30 °C Humidity: 60% RH max.

#### Treatment after open

- Reflow soldering must be done within 48 hours stored at the conditions of humidity 60% RH or less and temperature 10 to 30°C.
- 2. If the product must be stored after it is unpacked, store it in a dry box or reseal it in a moisture-proof package with desiccant at a temperature of 10 to 30°C and a humidity of 60% RH or less. Even then, mount the product within one week.

## **Baking**

In case that it could not carry out the above treatment, it is able to mount by the following baking treatment. However baking treatment shall be limited only 1 time.

Recommended conditions: 60°C for 24 to 48 hours (reeled one) 100°C for 8 to 24 hours (loose one)

Application examples provided in this document are for reference only. In actual applications, confirm equipment functions and safety before using the product.
 Consult your OMRON representative before using the product under conditions which are not described in the manual or applying the product to nuclear control systems, railroad systems, aviation systems, vehicles, combustion systems, medical equipment, amusement machines, safety equipment, and other systems or equipment that may have a serious influence on lives and property if used improperty. Make sure that the ratings and performance characteristics of the product provide a margin of safety for the system or equipment, and be sure to provide the system or equipment with double safety mechanisms.

Note: Do not use this document to operate the Unit.
